

Truck Receiving Systems

BRUKS Rockwood offers a complete line of truck unloading equipment capable of accommodating gross vehicle weight limits typically set forth by industrial operations. Our equipment is unique in that it offers customer reassurance by providing a structurally sound machine that can be installed with minimal erection expenses. The equipment is capable of handling truck & trailer lengths up to 85 feet (26 meter) and with a gross vehicle weight of 150,000 pounds (68,000 kilograms). The platforms can be accessorized with above grade receiving hoppers that will receive and process the most difficult to handle materials.

TECHNICAL DATA

<u>Platform Length</u>	<u>Platform Capacity</u>	<u>Hopper Storage Capacity*</u>	<u>Hopper Reclaim Capacity (max)*</u>
75 feet / 23 meters	120,000 pounds / 54,000 kg	4,000 cubic feet / 113 cubic meters	250 stph
85 feet / 26 meters	150,000 pounds / 68,000 kg	5,000 cubic feet / 140 cubic meters	250 stph

* Hopper sizes and capacities can be customized for the application as needed
