

# BR 1450

## High Capacity Butt Flair Reducer

BRUKS Butt Flair Reducers mill off the root flairs while preserving the natural conic and oval shape of the log. Specifically essential to benefit from today's advanced curve sawing lines, but also when straight sawing. Further with the butt logs reduced, also the capacity and uptime due to easier handling will also be achieved. From minimum to maximum log diameter without adjustments or settings.

The BR 1450 can do this with a capacity of up to 30 logs/min.

## TECHNICAL DATA

Min log Length:	3.2 m (10.5'), 2.5 m (8') with reduced milling length
Max log length:	6.2 m (20') standard, tree lengths models available
Max log dia:	900 mm (35")
Milling length:	1,320 mm (52")
Capacity reducing one log:	14 logs/min (log dia 200 mm / 8")
Capacity reducing every fourth log:	24 logs/min (log dia 200 mm / 8")
Weight:	approx. 7 Tons
