Wood Pellets

Hogged Bark and Wastes

BRUKS Rockwood's The CSR is primarily suited for wood based products such as wood chips and wood waste. The screw reclaim device is located above grade allowing pile stacking on top of the and providing completely automated reclaim. The mechanical equipment is located below grade requiring a small vault and tunnel. The CSR provides excellent metering of materials. Where covered storage is required please reference the BRUKS Rockwood Closed Storage Systems. Our Circular Reclaimers are also well suited for silos. The screws are designed to be installed outside underneath open storage piles as well as in silos providing totally closed storage. They provide excellent metering capabilities for digester or boiler feed.
