

BRUKS®

The NEW Generation Drum Chippers

The NEW Generation

Several feeding systems for different applications

Pulp-chips · Energy-chips · Micro-chips

Chip length

adjustable specific to the product,
for optimization of the following
processes

Enclosed machine housing

Reduced noise
Optimal personnel safety
Elimination of dust emission

Design

Horizontally fed drum chipper

Chip discharge downwards

Gravity fed drum chipper for short pieced material – Chip discharge downwards

Lower maintenance cost due to:

Segmented feeding rollers

Changeable wear plates at counter knife and rotor

Hardox at highly strained parts for longer life time

Counter knife anvil

Collapsible, secured with shear bolts

Removable for easy maintenance

Advantages

- Knife anvil secured with shear bolts
- Enclosed design
- No open pinch or shear points
- Chip discharge spout at floor level or downwards
- Flexible application due to modular machine design

Horizontally fed drum chipper
Chip discharge spout at floor level – no need for a pit

Horizontally fed drum chipper
Chip discharge downwards

Gravitiy fed Drum Chipper
Chip discharge spout at floor level – no need for a pit

Gravitiy fed Drum Chipper
Chip discharge downwards

The BRUKS Group is specialised in designing, manufacturing and supplying machines and turn-key solutions, for wood processing and bulk material handling projects in the bio-energy-, board-, saw mill- and pulp and paper industries.
