

Horizontally-fed bark hog

HORIZONTALLY FED MULTI-PURPOSE HOGS STURDY, EFFICIENT AND COMPACT

Multi-step size reduction in one machine for optimum plant efficiency.

Compact design for a minimum of space.

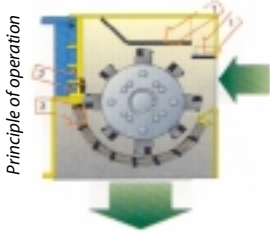

Sturdy machine for heavy impact with low wear and low spare parts requirements.

WELL THOUGHT-OUT DESIGN BASED ON MANY YEARS OF EXPERIENCE

- Modular design for more than a hundred combinations of different feeding conditions and rotors.
- Heavy-duty beaters and anvils dimensioned for more than just bark.
- Maintenance made easy by large service hatches and exchangeable wear plates.
- Easily exchangeable and mostly turnable wear parts.
- Bottom screens in several designs adapted to desired fraction size.

HORIZONTALLY FED MULTI- PURPOSE HOGS

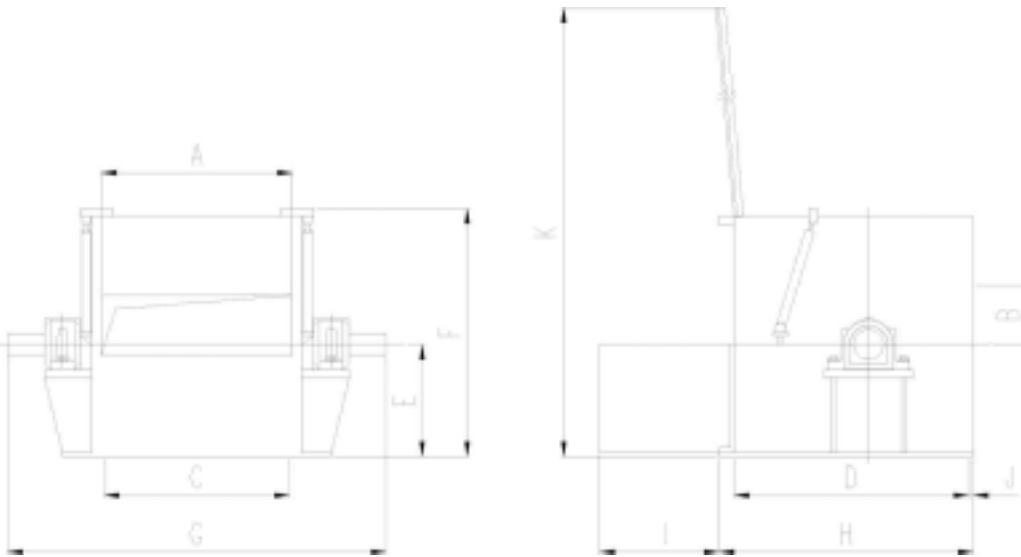

OPERATION

Bruks Rotom hogs feature three-step operation, as follows:

STEP 1 The material is fed in and thrown up against the anvil bar for a first size-reduction

STEP 2 The material is shredded against the anvils

STEP 3 The material is split up into its final fraction on its way through the bottom screen

Machine size	1	2	3	4	5	6	7	8	9	10
